

Declaration of Information Security

Aiming to become world's best shipbuilding and offshore facilities company, SHI recognizes the importance of information security and makes efforts to fulfill the following code of conduct to create an optimal environment for data protection and establish a culture of information security.

- 1. All employees of SHI recognize the importance of information security and make every effort to prevent illegal access and information leakage.**
- 2. We recognize SHI possesses national core technology and follow the procedures for physical access control that are the basis of information security.**
- 3. We cultivate a culture of information security considering the company's own characteristics and actively participate in sustained activities for the information security.**
- 4. To protect information assets of the company, we develop the best information security system and enable the company to continue in business in the event of a security incident.**
- 5. We strictly comply with domestic and foreign legal requirements relevant to information security and take the lead in healthy information culture.**

We declare that we will establish the regulations of information security and faithfully abide by them in order to observe the data protection code of conduct as above.
